Our mission and dedication is to give you financial peace of mind.

The Coburn & Meredith Value

Coburn & Meredith, Inc. was co-founded in 1934 by Robert Coburn with the dual purpose of providing underwriting services to businesses in need of capital, coupled with investment advice to high net worth individuals. Eighty years later, the firm thrives as a full-service investment firm, offering a personalized approach to managing money. Capital markets may have changed over the years, but Coburn & Meredith stands today as it has since the beginning, firmly at the side of our clients.

By virtue of our conservative business philosophy, we have withstood the test of time in turbulent, complex, and ever-evolving financial markets. It is this stability and commitment that has afforded us an enviable reputation as a client-focused investment management firm. At Coburn & Meredith, our entire staff – from senior management to financial advisors to support and compliance associates – is focused on our clients. In every aspect of the firm's business, the emphasis on professional service remains a cornerstone just as it did eighty years ago.

Our Services and Product Offerings

Establishing a detailed personal financial plan is an essential avocation that we encourage you to discuss with your advisor. Managing a lifetime of unpredictable financial challenges requires careful planning. The financial advisors at Coburn & Meredith will help you evaluate the issues affecting you financially such as portfolio management, retirement planning, higher education expenses, long-term budgeting, estate planning, and wealth preservation.

Your financial advisor will work with you as your situation evolves, ensuring that you remain on track.

Portfolio Management

We are available to help you implement a customized investment plan or manage an existing portfolio. We manage risk through the creation of an appropriately diversified portfolio and by using investment products that match your personal risk tolerance. We will conduct periodic reviews as part of our commitment to keep an open dialogue with you.

Retirement Planning

Whether retirement is near or far, we can offer ways to help you maximize your retirement savings. We will evaluate your existing retirement accounts—pensions, IRAs, SEPs, 401(k) plans, annuities—and provide advice to help you maximize income upon retirement. We will also help reposition investments held in these accounts, keeping your assets properly diversified. If retirement is approaching, we will determine the most effective strategies for converting these assets into reliable income.

Estate Planning

No matter your age or net worth, you need an estate plan to protect yourself, your loved ones, and your assets. We will conduct a review of your current financial situation and devise a plan that will help ensure that your assets are distributed to your beneficiaries as you intended, in a tax- and cost-efficient manner. By starting now, we can help determine the most appropriate use of trusts, gifting programs, and other strategies to help protect your assets for future generations.

Education Planning

Meeting the costs of higher education is a concern for many of our clients. We will work with you to develop a realistic estimate of what those costs might be and then implement an investment program to help you meet those costs.

Insurance and Annuities

As part of our thorough planning process, we will determine if your current level of insurance is sufficient enough to provide adequate protection for your dependents. Our goal is to facilitate a higher level of confidence in our clients' ability to mitigate and prepare for unforeseen life events. Annuities and insurance products are also an effective tool in estate planning, particularly as it relates to protecting assets for future generations.
